

COMPENSATION PROJECT

Vichada Climate Reforestation

Reforestation for biodiversity protection, ecosystem restoration and timber production

GENERAL PROJECT INFORMATION

Project Type	Afforestation, Reforestation
Location	Colombia
Project Size	84,310 ha
Emission Reduction	4,040,545 t CO ₂
Standard	Gold Standard, FSC

ABOUT THIS PROJECT

The project is located in the Vichada Department and the Orinoco river basin, combining reforestation for timber production with biodiversity protection and ecosystem restoration.

In addition to the reforestation of the savannah, the project protects the remaining patches of native vegetation and creates additional conservation areas on the banks of rivers and other watersheds. The forests offer a natural habitat for native animals and plants, protect and enrich the soil, save and filter water and contribute to the mitigation of the greenhouse effect.

For the project developers, regional employment is a special priority, including capacity building and technology transfers.

Benno Fuchs
Manager Sales Climate Solutions

FORLIANCE offers companies successful solutions for climate protection. To achieve this, our team of international experts develops together with you individual climate protection strategies and projects – for 20 years now.

**OUR
CONTRIBUTIONS**

**Social
benefits**

- Creation of regional job opportunities and reduced migration
- Promotion of education and financial support for different schools in the project area in order to stop child labour
- Focus on building a diverse and multicultural team with equal rights for all participants
- Integrated capacity building and environmental education programmes for local communities

**Ecological
benefits**

- Soil erosion prevention to protect the nutrients and soil microelements
- Creation of shelter for migratory and native animals and insects due to reforestation activities
- Forest conservation creates natural corridors and ensures the connectivity of regional native ecosystems
- > 50,000 ha of additional protection area

This project focuses on the following Sustainable Development Goals:

**COMMUNICATION
