

FORLIANCE initiates, finances, creates and manages robust nature-based climate projects and integrates them into sustainability strategies with our clients to achieve their Net Zero Carbon targets. Together with our global partners, and our 50+ team members in ten countries, we strive to create intact forests and ecosystems that positively impact our climate, biodiversity and human well-being. We offer companies effective solutions for climate protection by developing individual climate protection strategies.

To support our team's mission to proactively promote climate protection in Mexico, we are looking for a

Forest Carbon Project Coordinator

Together with our team, you will be overseeing the implementation of forest carbon projects in Mexico and thus proactively support us in promoting nature-based climate protection.

YOUR TASKS:

- Responsible for the coordination of nature-based carbon projects in different regions across Mexico
- Aligning the technical certification team with local forestry partners and strategic priorities of the management team
- Regular reporting to key stakeholders and ensuring an efficient flow of information amongst participating organizations
- Preparing and participating in strategic decisions to deliver the optimum impact for FORLIANCE, our partners and local ecosystems
- Supporting the scouting of nature based carbon projects
- Overseeing the delivery of KPIs for quality, schedule and finances
- Coordination with the FORLIANCE team, including management, technical project development,

YOUR PROFILE:

- University degree in resource management, forestry, agriculture or related field
- At least 3 years of relevant project management experience in sustainable land use and forestry, preferably in Mexico
- Proven experience of simultaneous management of nature-based projects with diverse international stakeholders
- Experience in aligning the delivery of technical services with relevant business and financial KPIs
- Fluent in English and Spanish
- Willingness to travel within Mexico (up to 25% of time)

This is a full-time position. Workplace in Mexico, preferably Mexico City area (remote). Starting date as soon as possible. We look forward to receiving your application in English with CV, a description of your expertise, salary expectation and earliest start date via e-mail to jobs@forliance.com

Uschi Dellian
Manager HR & Office

WHAT WE OFFER:

- Collaboration in an international interdisciplinary and dynamic team
- Exciting field of work at the interface between business and climate protection
- A casual work environment with impact
- A comprehensive introduction to our team and processes while providing the space to develop your own solutions – new ideas are expressly welcome
- Remote work possible if preferred
- Regular training and capacity building

OUR MISSION:

We let values **GROW**:

- we grow well financed, managed and monitored forests and ecosystems
- we grow long-term alliances with project stakeholders and clients
- we grow financial mechanisms and payment for ecosystem services to scale and improve projects
- we grow transparency and traceability through robust carbon standards, digital solutions, and earth observation technologies
- we grow the competency of our team by trainings, education and onboarding world leading experts

We create positive impact on our **CLIMATE**:

- we partner with implementation organizations, international investors and development banks to develop the most robust climate projects
- we help industry clients to account and manage their greenhouse emissions
- we monitor, report and verify impact and results of performance indicators
- we create climate solutions that are based on scientific research
- we initiate transformation to fight climate change and to achieve carbon targets.

We take **ACTION**:

- we mobilize finance for ecosystem services and develop new integrated value chains together with local stakeholders
- we use nature to build robust and proven carbon sinks by applying internationally recognized carbon standards and methodologies
- we turn carbon reduction plans into concrete action, and projects
- we think new ways and combine proven nature-based solutions with innovative financial mechanisms and state-of-the-art technology
- we unlock new climate action project types and promote developing of new methodologies for carbon sinks
