

FORLIANCE initiates, finances, creates and manages robust nature-based climate projects and integrates them into sustainability strategies with our clients to achieve their Net Zero Carbon targets. Together with our global partners, and our 50+ team members in ten countries, we strive to create intact forests and ecosystems that positively impact our climate, biodiversity and human well-being.

To support our team's mission to proactively promote climate protection, we are looking for a

Expert in Carbon Methodology Development

Together with our team you will develop carbon certification methodologies in the field of agricultural (including agroforestry), forest management and peatlands for an international expert group.

YOUR TASKS:

- Elaboration of technical scoping papers as a preparation for the development of certification methodologies
- Development of certification methodologies in the fields of agricultural land management, forest management and peatland restoration
- Management of working group sessions with international experts
- Preparation, implementation and evaluation of public consultations
- Conduction of expert interviews, preparation of surveys and independent desk research
- Reporting and documentation

YOUR PROFILE:

- Knowledge about the environmental and climate impacts of land use (agriculture, forestry, peatlands) activities
- Expert knowledge about the voluntary and regulatory carbon market
- Proven experience in carbon farming methodology development
- Relevant higher education degree
- Minimum 4 years of specific professional experience
- Fluency in English (Minimum C1 level)
- Experience with working in an international multi-stakeholder environment
- Independent work style and very good communication skills

This is a freelance position. We look forward to receiving your application via our Expert database: <https://ecd.forliance.com/>

Uschi Dellian
Manager HR & Office

WHAT WE OFFER:

- Collaboration in an international interdisciplinary and dynamic team
- Exciting field of work at the interface between business and climate protection
- A casual work environment with impact
- A comprehensive introduction to our team and processes while providing the space to develop your own solutions – new ideas are expressly welcome

OUR MISSION:

We let values **GROW**:

- we grow well financed, managed and monitored forests and ecosystems
- we grow long-term alliances with project stakeholders and clients
- we grow financial mechanisms and payment for ecosystem services to scale and improve projects
- we grow transparency and traceability through robust carbon standards, digital solutions, and earth observation technologies
- we grow the competency of our team by trainings, education and onboarding world leading experts

We create positive impact on our **CLIMATE**:

- we partner with implementation organizations, international investors and development banks to develop the most robust climate projects
- we help industry clients to account and manage their greenhouse emissions
- we monitor, report and verify impact and results of performance indicators
- we create climate solutions that are based on scientific research
- we initiate transformation to fight climate change and to achieve carbon targets.

We take **ACTION**:

- we mobilize finance for ecosystem services and develop new integrated value chains together with local stakeholders
- we use nature to build robust and proven carbon sinks by applying internationally recognized carbon standards and methodologies
- we turn carbon reduction plans into concrete action, and projects
- we think new ways and combine proven nature-based solutions with innovative financial mechanisms and state-of-the-art technology
- we unlock new climate action project types and promote developing of new methodologies for carbon sinks
