

FORLIANCE initiates, finances, creates and manages robust nature-based climate projects and integrates them into sustainability strategies with our clients to achieve their Net Zero Carbon targets. Together with our global partners, and our 50+ team members in ten countries, we strive to create intact forests and ecosystems that positively impact our climate, biodiversity and human well-being. We offer companies effective solutions for climate protection by developing individual climate protection strategies.

To support our team's mission to proactively promote climate protection, we are looking for a

Senior Manager Natural Climate Solutions

Together with our team, you will lead the development of nature-based climate projects and play a critical role in addressing climate change through the implementation of high-quality carbon reduction and removal initiatives.

YOUR TASKS:

- Lead the development of nature-based climate projects, including conducting feasibility studies and designing project documents (PDDs) in compliance with international carbon standards (Verra, Gold Standard, CAR).
- Plan and implement the full carbon project development cycle, including reports for project registration, validation, and verification.
- Oversee compliance of carbon projects with annual monitoring and standard guidelines updates
- Support on quality checks/quality assurance for deliverables to ensure the certification of high-quality nature-based projects
- Design, organize, and conduct site visits and travel to project locations as needed.
- Collaborate with other division to keep the carbon portfolio updated.
- Provide technical guidance and expertise on the development and implementation of advisory nature-based projects.

YOUR PROFILE:

- Degree in forestry, sustainable resources management, agriculture, agroforestry studies or related field.
- 3+ years of experience in carbon project development
- Strong knowledge of international carbon standards (Verra, Gold Standard, CAR) and experience working with these standards.
- Experience in designing and implementing monitoring, reporting, and verification (MRV) plans for carbon projects.
- Ability to work independently and manage multiple projects simultaneously.
- Excellent communication and interpersonal skills.
- Fluent in English, Spanish is an advantage
- Willingness to travel to project sites as needed

Be part of our excellent team and contribute to climate protection/ our mission. – This is a full-time position. Workplace in Germany, Spain or the Netherlands preferred. We look forward to receiving your application via e-mail to jobs@forliance.com.

Uschi Dellian
Manager HR & Office

WHAT WE OFFER:

- Collaboration in an international interdisciplinary and dynamic team
- Exciting field of work at the interface between business and climate protection
- A casual work environment with impact
- A comprehensive introduction to our team and processes while providing the space to develop your own solutions – new ideas are expressly welcome
- Remote work possible if preferred
- Regular training and capacity building

OUR MISSION:

We let values **GROW**:

- we grow well financed, managed and monitored forests and ecosystems
- we grow long-term alliances with project stakeholders and clients
- we grow financial mechanisms and payment for ecosystem services to scale and improve projects
- we grow transparency and traceability through robust carbon standards, digital solutions, and earth observation technologies
- we grow the competency of our team by trainings, education and onboarding world leading experts

We create positive impact on our **CLIMATE**:

- we partner with implementation organizations, international investors and development banks to develop the most robust climate projects
- we help industry clients to account and manage their greenhouse emissions
- we monitor, report and verify impact and results of performance indicators
- we create climate solutions that are based on scientific research
- we initiate transformation to fight climate change and to achieve carbon targets.

We take **ACTION**:

- we mobilize finance for ecosystem services and develop new integrated value chains together with local stakeholders
- we use nature to build robust and proven carbon sinks by applying internationally recognized carbon standards and methodologies
- we turn carbon reduction plans into concrete action, and projects
- we think new ways and combine proven nature-based solutions with innovative financial mechanisms and state-of-the-art technology
- we unlock new climate action project types and promote developing of new methodologies for carbon sinks
