

CLIMATE PROTECTION PROJECT
XiCO₂e Projects

Our project umbrella in Mexico to protect and enhance biodiversity while empowering local communities

GENERAL PROJECT INFORMATION	XiCO ₂ e: Durango Forest Project	XiCO ₂ e: Mexican Peninsula Forest Project	XiCO ₂ e: Mexican Reforestation Project
Project Type	IFM	IFM	A/R
Location	Mexico: Durango	Mexico: Yucatán	Mexico: Tabasco et al.
Project Size	181,000 ha forest 328,783 ha total	72,460 ha	1,341 ha
Available from issuance 2023/24	≈ 500,000 t CO ₂	≈ 120,000 t CO ₂	≈ 80,000 t CO ₂
Project Partners	—————	Ala Bool Trust SA de CV, Ejidos	—————
Standard	<u>CAR</u> , FSC	<u>VCS</u> , FSC, CCBS	<u>VCS</u>

ABOUT THIS PROJECT

The XiCO₂e project is a comprehensive initiative spanning four regions of Mexico – the Durango, Tamaulipas, and Tabasco states, and the Yucatán Peninsula – with a goal to promote sustainable forest management, enhance carbon sequestration, and empower local communities. The project aims to replant degraded areas with a diverse array of trees and support community forest management through regular training in sustainable resource management.

This project is not just about preserving the forest and biodiversity. It is also about improving the quality of life for the people living in these regions. By providing access to employment opportunities and enabling local people to become stewards of their own land, the project is helping to build a better future for communities across the three regions.

Through this ambitious initiative, the XiCO₂e project is setting an inspiring example of what can be achieved when people come together to create positive change for their environment and their communities.

Marcel Thiele
Director Partnerships

FORLIANCE offers companies successful solutions for climate protection. To achieve this, our team of international experts develops together with you individual climate protection strategies and projects – for over 25 years now.

Contributions

XiCO₂e: Durango Forest Project

- Creation of local employment opportunities
- Community empowerment through active participation in all stages of project development; regular trainings and knowledge generation
- Biodiversity protection and establishment of new habitats
- Conservation of upper basins and hydrological environmental services
- Native vegetation restoration and increased carbon sequestration

XiCO₂e: Mexican Peninsula Forest Project

- Poverty alleviation: new income sources and wealth creation for local communities
- Integrated capacity building and environmental education programmes for locals
- Soil erosion prevention to protect the nutrients and soil microelements
- Creation of shelter for migratory birds and native species, especially under threat
- Fire management and forest patrols resulting in prevention of fires and a return of wildlife to the area, supported by neighboring local communities

XiCO₂e: Mexican Reforestation Project

- Strengthening the managerial, planning and organizational capacity of residents through regular training; growing local economy
- Reducing vulnerability, enhancing resilience in previously degraded land
- Preservation and valorization of forest natural habitats
- Creation of protection for streams and watercourses

The projects focus on the following Sustainable Development Goals:
